JLD

**PROTECT 1000
HALF MASK**

A MAJOR BREAK-THROUGH IN RESPIRATOR TECHNOLOGY

JLD, who continue to be the only manufacture for the complete range of Masks, Gas Filter Canisters type A, B, E and K with I, II and III class certified by the Bureau of Indian Standards; now offers you HALF MASK & FILTERS also approved & certified by the BIS with IS 14746-1999 license no. CM/L - 7855904. This is another first from the Joseph Leslie Group, who have continuously pioneered quality safety systems or the Indian Industry.

Protect 1000

The Protect 1000  marked Half Mask combines a high grade soft thermoplastic elastomer in a hard shell for perfect fit. It has a flexible nose bridge for effective sealing, oneway exhalation valve and a newly designed cradle type head harness guaranteeing comfort and easy adjustment during donning. The Mask is

provided with EN 148-1 connection (Screw-in type) suitable for Screw- in Filters

By combining a very soft thermoplastic Elastomer body with a “hard body shell” this Half Mask offers the highest protection level that was only possible with Full Face Masks.

The cumbersome filter housing is now eliminated, making the mask smaller, lighter, with an unrestricted view and is naturally more ergonomic. The Protect 1000 can be effectively used on all facial shapes as it has a universal fit, due to the specially designed flexible nose bridge. The newly designed head harness, fitted with a non-slip binding, guarantees comfort, security and easy adjustment during donning.

The Protect 1000 Mask can be used with the complete range of Class one filters as per IS 15323 / " EN 14387 " and Particulate filters as per IS 15322/EN 143 having standard connecting threads as per IS 14138 (I) / EN 148 (I). Together, the half mask and the respiratory filter forms a protective filter device against: harmful gases and vapours, particulate matter (airborne particulates such as dust, fumes and mist).

The mask is compatible with all filters having "EN 148 (I)" connection and weighing less than 300gms. JLD also manufactures  marked filters in a sturdy Aluminium body suitable for the Protect 1000.

 marked filters available for the following gases :-

- Acidic Gases , type E
- Inorganic Gases , type B
- Ammonia and derivatives , type K
- Organic Vapours , type A
- Particulate filter , type P (P1, P2 or P3)
- Combination of above

Protect 1000 Mask is compatible with a wide range of filters offered by other approved source with Rd40 threads.

Approvals

- IS 14746:1999;  mark licence no. CM/L-7855904 for "Protect 1000" Half Mask
